

WAGS REPORT**DATE: 9/2/2022****WIND: E-ESE / 8-12kn****COURSE: ALPHA REVERSE****NUMBER OF BOATS: 54**

After the storm last week and the windy weather earlier in the week, we all thought we were due for a nice afternoon. What a cracker it turned out to be! There was a question on which direction we would go on course Alpha, so once the start boat was on course and the true wind direction established, the reverse direction was a good choice. This gave a windward start and a great long beat all the way to Hope Banks. The flooding tide was something all skippers and crew needed to think about, especially those who might have gone too far south and made hard work for themselves to get back up to the mark. After port rounding at Hope, a great run back between Green and Saint Helena saw the fleet compress and power up on a broad reach home to the finish. Awesome arvo!
